ANNOUNCEMENT FROM THE U.S. DEPARTMENT OF LABOR

Provided by Becki DePasquale, Operations Director
Safety Resources Company of Ohio, Inc.

The U.S. Department of Labor’s Occupational Safety and Health Administration along with other federal safety agencies have announced that May 2-6, 2016 has been designated as the third annual National Safety Stand-Down which will highlight the importance of preventing falls – the leading cause of worker death and serious injury in the construction industry.

More than four million workers participated in the 2014 and 2015 Safety Stand-Downs and it is expected that thousands of employers across the nation will participate in the 2016 week-long initiative.

This nationwide event is an effort to remind and educate employers and workers in the construction industry of the serious dangers of falling.

Employers, both large and small, are urged to participate to prevent falls in construction. Some suggestions for promoting fall prevention are:

- Plan a site specific tool box talk or other safety event highlighting fall prevention
- Take a break with workers to talk about preventing falls in the workplace
- Provide a training session for all workers which instructs them in fall hazards and means of fall prevention.

Employers can visit the official National Safety Stand-Down website for information and ideas on how to make your events successful. Visit http://www.osha.gov/StopFallsStandDown/ for more information.

March 17, 2016

Speaker: Margie Roop, LPCC-S; CEAP; SAP, LifeServices EAP, Regional Director, Ohio

Topic: “Stress at Work; Stress from Work: Which is it & How Safety is at Risk!”

Spotlight Company
Industrial Environmental Monitoring Instruments

Industrial Environmental Monitoring Instrument Company is located north of Columbus in Worthington Ohio. Our years in business have taught us that to be successful you must offer quality products, have a knowledgeable staff, great customer service with a certified repair team doing it correctly the first time. These are some of the different type of monitoring devices that we have for your applications. Water quality, sampling, waste, flow, soil samplers, survey equipment, metal detectors, photo and flame ionization detection, gas meters, industrial hygiene equipment fall protection and more.

**Q: What does OSHA require in regards to violence in the workplace and active shooter programs and training?**

**A:** OSHA does not have a specific standard on violence in the workplace or active shooter/active killer situations. However, under the General Duty Clause, Section 5(a)(1) of the Occupational Safety and Health Act (OSHA) of 1970, employers are required to provide their employees with a place of employment that "is free from recognizable hazards that are causing or likely to cause death or serious harm to employees." An employer that has experienced acts of workplace violence, or becomes aware of threats, intimidation, or other indicators showing that the potential for violence in the workplace exists, would be on notice of the risk of workplace violence and should implement a workplace violence prevention program combined with engineering controls, administrative controls, and training.

There are many options to start on this journey. The BWC has a half day violence in the workplace class and your BWC consultant or local law enforcement can help you create a policy. Training can be done in-house, online or with your local law enforcement. There are many companies that focus on security and violence in the workplace if you are interested in seeking other outside help. Two well known training programs dealing with active shooters are: The Department of Homeland Security’s: Run, Hide, Fight and the ALiCE method offered by the ALiCE training institute.

Stress in the Workplace: A Costly Epidemic

Provided by Colleen Mauer
Human Resources Manager, Paarlo Plastics, Inc.
& Stark County Safety Council Steering Committee Member

Three out of every four American workers describe their work as stressful. And the problem is not limited to these shores. In fact, occupational stress has been defined as a "global epidemic" by the United Nations' International Labor Organization.

While the physical effects of this epidemic are often emphasized, the economic consequences also are alarming. Workplace stress costs U.S. employers an estimated $200 billion per year in absenteeism, lower productivity, staff turnover, workers' compensation, medical insurance and other stress-related expenses. Considering this, stress management may be business's most important challenge of the 21st century.

Of course, stress is a factor in every one's life, particularly during major events such as marriage, divorce or buying a home. But according to the Holmes-Rahe Life Events Scale, which rates the levels of stress caused by such events, many of the most stressful events are related to the workplace: firings, business readjustments, changes in financial status, altered responsibilities, a switch to a different line of work, trouble with the boss, variations in work hours or conditions, retirement and vacations.

Surprisingly, stress is not always a bad thing. It can stimulate creativity and productivity. According to Robert Ostermann, professor of psychology at FDU's Teaneck-Hackensack Campus, "No one reaches peak performance without being stressed, whether an athlete, an office worker or a manager." The natural pattern of human behavior is to experience a stress-causing event or situation, react to it with increased tension and then return to a normal, relaxed state. The problem occurs when stress is so overwhelming or constant that this pattern is broken.
Safety Series for Industry Workshop Module 4—March 14—1:00 p.m.-4:30 p.m.
Welding and Brazing Safety—March 15—8:30 a.m.-4:30 p.m.
OSHA Recordkeeping Half-day Workshop—March 17—8:30 a.m.-Noon
Accident Analysis Half day Workshop— March 17—1:00 p.m.-4:30 p.m.
Restaurant & Food Service Safety Workshop—March 21-8:30 a.m.-noon
Combustible Dust Hazards: Recognition, Evaluation & Control Recommendations—March 23—8:30 a.m.—4:30 p.m.
First Aid in the Workplace—March 30—8:30 a.m.-4:30 p.m.
Controlling Workers’ Compensation Costs—March 31—8:30 a.m.-4:30 p.m.
Basic Construction Safety (OSHA 30) - April 4-8
Measuring Safety Performance—April 12—8:30 a.m.-4:30 p.m.
Safety Series for Industry Workshop Module 5—April 18—1-4:30 p.m.
Job Safety Analysis—April 21—8:30 a.m.-noon
Powered Industrial Trucks: Developing a Training Program Half-day workshop 1-4:30 p.m.
Ergonomics: Basic Principles April 26—8:30 a.m.—4:30 p.m.
Industry Safety for the Non-safety Professional—April 27-28—8:30 a.m.-4:30 p.m. both days
Safety for the Non-safety Professional—May 5 - 8:30 a.m.-4:30 p.m.
Trenching and Excavation—May 10-11—8:30 a.m.-4:30 pm. both days
First Aid in the Workplace - May 17—8:30 a.m.-4:30 p.m.
Thermal Stress—May 18—8:30 a.m.-noon
Hazard Communication—May 24—8:30 a.m.-4:30 p.m.
